TO: *All Guest Accommodation or Guest Home Owners in Jo Daviess County*

FROM: *Jo Daviess County Planning & Development Department*

RE: *Application for Guest Accommodations License in Jo Daviess County, Illinois*

In accordance with the Guest Accommodations Ordinance adopted by the Jo Daviess County Board on August 10, 1999 and effective January 11, 2000, all rental property owners must apply for a Guest Accommodations License for each of their rental properties within the County.

An application for the License, a list of application requirements and a component form listing some of the ordinance requirements are enclosed. The procedure for application is as follows and must be completed for each rental property:

1. Complete and sign the "*Application for Guest Accommodations License*".
2. Return the completed application along with the application fee (see "*Fees*") and all necessary paperwork as listed on the "*Guest Accommodations License Application Requirements*" to the Jo Daviess County Planning & Development Department, address above.
3. Your application and paperwork will be reviewed and this office will contact you or your rental agent to set up a convenient time and date for inspection.

Fees: License year runs January 1st to December 31st

Guest Home/House (single family dwelling) - \$350 for initial year, \$300 per year thereafter.

Guest Accommodation (facility containing 16 or fewer units) - \$350 for the initial year, \$300 per year thereafter.

(Please make checks payable to: Jo Daviess County Treasurer)

Thank you in advance for your cooperation. If you have any questions or would like a copy of the Guest Accommodations Ordinance sent to you, please call the Planning & Development Department at 815-591-3507 or 815-591-3810.

Guest Accommodations License **Application Requirements**

The applicant shall supply the Planning & Development Department with the following information.

1. Completed Application
2. Application Fee
3. Proof of liability insurance in an amount not less than \$150,000/\$300,000 per occurrence, one each establishment.
4. Every facility not on a central sewer must have their septic pumped every four (4) years or as often as the County Health Officer may require. A copy of your most recent pumper's report and a copy of the septic permit must be submitted.
5. Every facility not on a central municipal water system must have its well water tested a minimum of once every year. A copy of the test results must be provided at the time of application.
6. Every facility utilizing any gas, oil or solid fuel burning appliance or apparatus, including but not limited to, furnaces, fireplaces, wood stoves or hot water heaters, shall have each such appliance or apparatus inspected annually by a licensed heating contractor. A copy of the inspection must be provided at the time of application.
7. Two copies of the buildings floor plan.

* Septic and well information can be obtained at the Jo Daviess County Health Department – Environmental Health Division (815) 777-0283.

Guest Accommodations Component Form

Jo Daviess County has passed a Guest Housing Ordinance to establish standards for rental housing. Most of the requirements of the ordinance are items that are required of new homes, but some are not.

Some of the requirements are as follows:

1. Well and septic systems must meet County Health Department requirements.
2. Hard-wired and interconnected smoke detectors with battery backup are required in every sleeping room and in hallways or common areas outside of sleeping rooms. In addition, a minimum of one such detector is required on each floor. (International Residential Code 2012; I.R.C. R314)
3. Carbon monoxide detectors are required on each floor of the facility within 15' of each bedroom, and must be installed according to manufacturer's recommendations. (I.R.C R315)
4. Egress – Each bedroom must have either an exterior door or an operable window meeting egress requirements. (I.R.C. R310)
5. Minimum of 36" high guardrails must be in place on any deck over 30" above grade, and on balconies or landings, balusters or horizontal guardrail members must be in place to meet the spacing requirements in effect at the time the house was constructed, but baluster spacing on older homes shall not exceed 6" maximum. Any new baluster design shall not exceed 4" clear opening between balusters or horizontal guardrail members. (I.R.C. R312.1.1)
6. Handrails must be on any stairway over 3 risers. (I.R.C. R311.7.8)
7. Stairways shall have a minimum run of 10" and a maximum rise of 7" with no more than a 3/8" difference between risers. (I.R.C. R311.7 – R311.7.2)
8. GFI protection must be provided on bathroom and kitchen counter outlets and any other outlets susceptible to moisture. (I.R.C. E3902)
9. Combustion Air must meet the Uniform Mechanical Code. (International Mechanical Code 2012 CH7)

(Purposely left blank)

Building Guide

ILLOWA Chapter of ICC

Single Family Residential Emergency Escape and Rescue Openings

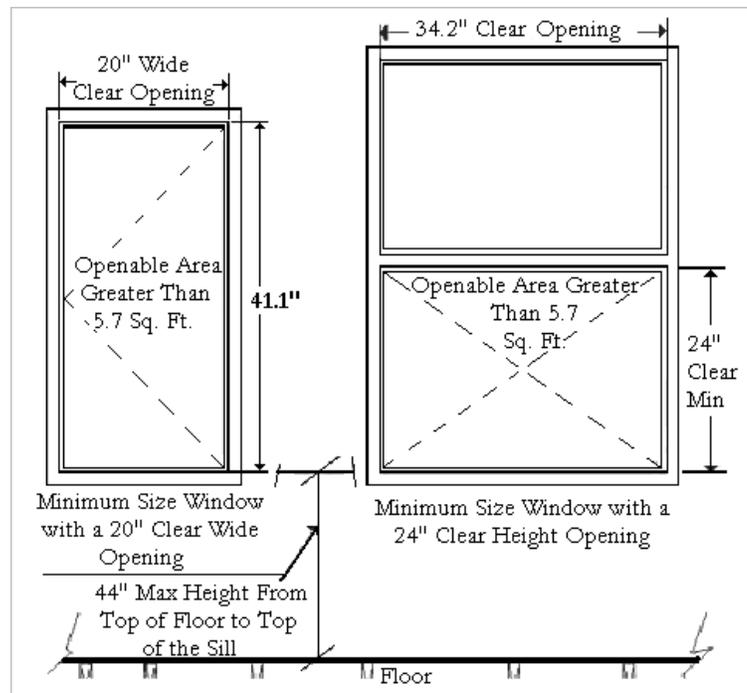

All basements AND every sleeping room shall have an emergency escape and rescue opening that shall meet all of the following requirements. **Exception:** Basements not exceeding 200 square feet and used ONLY to house mechanical equipment. : (IRC 310.1)

- Maximum height from finished floor to finished sill of escape-rescue window is 44" (IRC 310.1)
- 24" minimum net clear opening height (IRC 310.1.2)
- 20" minimum net clear opening width (IRC 310.1.3)
- 5.7 ft² (821 in²) overall minimum net clear opening

Exception: Grade Floor opening shall have a minimum of 5 square feet. (IRC 310.1.1) as measured in the open position – top pane of double hung windows does NOT count towards net clear opening due to the specialized knowledge required to open. (IRC 310.1.4. See illustration)

NOTE: a step, landing, stage, box or other structure used to attempt to thwart the intent of the code by artificially reducing the distance between the finished floor and the sill height shall NOT be considered part of the finished floor.

Construction that was completed prior to January 1, 2012 is allowed to utilize the step, landing, stage or box. This will be allowed and permitted until such time that the room has a remodel or repair completed.

Minimum Width/Height (W/H) requirements for Emergency Escape and Rescue Windows (in inches)

Width	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	34.2
Height	41.1	39.1	37.3	35.7	34.2	32.8	31.6	30.4	29.3	28.3	27.4	26.5	25.7	24.9	24.1	24

Bars, grilles, covers, screens or similar devices are permitted to be placed over emergency escape and rescue openings provided the devices do not encroach on the minimum net openings and are releasable or removable from the inside without the use of a key, special knowledge or effort. (IRC 310.4) Specific security grill systems require approval by the Department of Building Safety prior to installation.

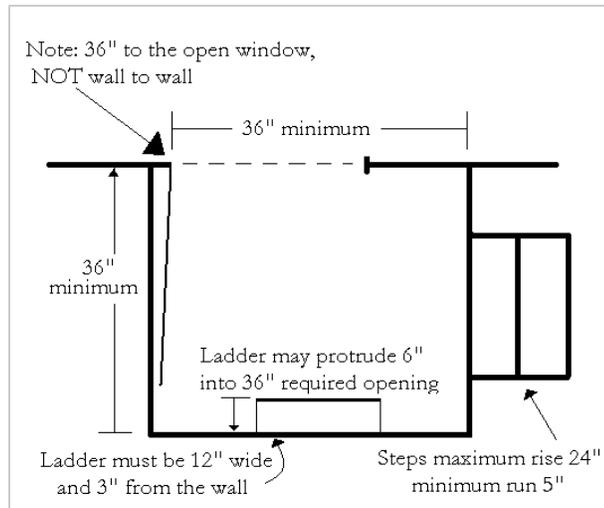

Escape and rescue windows with a finished sill height below the adjacent ground elevation shall have a window well. Window wells at escape or rescue windows shall comply with IRC R310:

- The clear horizontal dimensions of the well shall allow the window to be fully opened and provide a minimum accessible net clear area of 9 square feet with a minimum dimension of 36 inches. See Illustration.

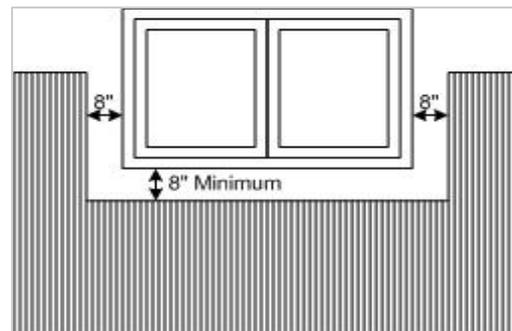

- Window wells with a vertical depth of more than 44 inches shall be equipped with an approved, permanently affixed ladder or stairs that are accessible with the window in the fully open position. (IRC 310.2.1)

If using a ladder: Ladders shall have an inside rung width a minimum of 12 inches, shall project a minimum of 3 inches from the wall and the rungs shall not be spaced further than 18 inches in center vertically. (IRC 310.2.1)

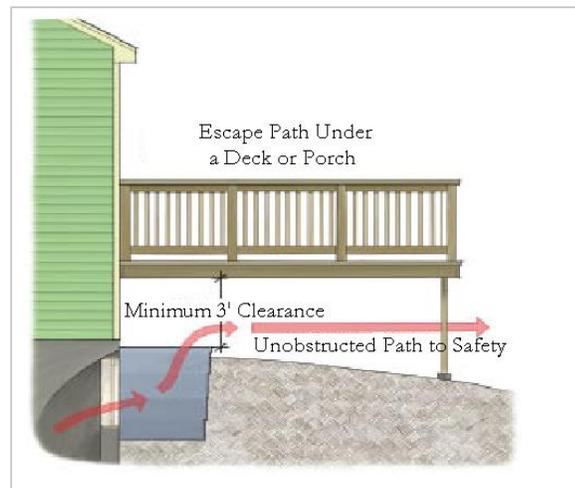

If using steps: Steps shall have a minimum tread width of 12 inches, shall have a maximum rise of 24 inches and a minimum run of 5 inches. (IRC 310.2.1 as amended) shall not encroach into the required dimension of the window well by more than 6 inches.

Window well must extend at least 8" beyond each side of the window to provide a wood/earth separation to prevent rot per (IRC 317.1.2)

Exit under a deck or porch: Emergency escape windows may be located under a deck or porch provided all other requirements are met AND the location allows for a CLEAR PATH not less than 36" in height. (IRC 310.5). A CLEAR PATH is not obstructed by an enclosure or latticework.

NOTE: A permit to install an egress window in no way allows creation of an additional dwelling unit, nor does it make a basement bedroom legal that was built without a permit. Additional permits are required for other modifications to the basement, for example, to finish a room, add a bedroom, or to add a dwelling unit.

DISCLAIMER: ILLOWA Chapter of the ICC has created this handout to assist with plans submittal under the 2009 International Residential Code, and it is not intended to cover all circumstances. Please check with the Department of Building Safety for additional requirements.

Application for Guest Accommodations License In Jo Daviess County, Illinois

All applicants for licensure must complete this application form and furnish all required supporting documents. Failure to do so will result in the rejection of the application and non-issuance of a Guest Accommodations License.
