

## **COMMUNITY OUTREACH:**

The Jo Daviess County LEPC has worked hard to develop excellent relationships with numerous agencies and associations as well as neighboring LEPCs. A close working relationship exists with the companies that manufacture, use, store or distribute chemicals within Jo Daviess County. There is an on-going association with all Tier II reporting facilities, as the LEPC performs a County Hazardous Analysis and prepares a Disaster Plan for Jo Daviess County.

By joining forces with these companies and organizations, the Jo Daviess County LEPC can focus on providing the community with a better understanding of the chemicals present in the community and the safety procedures that are in place.
